

## Keynote speakers of the WETPOL 2007 symposium

**Prof. Hans Brix** (Aarhus University, Denmark)

co-author Tom Headley (Hamilton, New Zealand)

*The role of macrophyte-derived organic carbon for denitrification in treatment wetlands*

**Dr. Christopher Craft** (Indiana University, USA)

*Tidal marshes and climate change (preliminary title)*

**Prof. Nancy B. Dise** (Manchester Metropolitan University, UK)

*Atmospheric deposition, microbial cascades and ecosystem responses*

**Prof. Chris Freeman** (University of Wales, UK)

*Molecular and microbial advances in wetland research*

**Prof. emer. Robert H. Kadlec** (University of Michigan, USA)

*Comparison of free water and horizontal subsurface wetlands to treat nutrients and pollutants*

**Prof. William J. Mitsch** (Ohio State University, USA)

*Restoration of coastal and riverine wetlands*

**Prof. Jerome Nriagu** (University of Michigan, USA)

*Dynamics of heavy metals in wetlands*

**Prof. Jos T.A. Verhoeven** (University of Utrecht, The Netherlands)

co-author M.B. Soons

*Wetland restoration for biodiversity or environmental quality: landscape considerations*
